19. Explanation of the Pfizer, Moderna and Janssen EUA data.
20. Pfizer, Moderna and Janssen genetic vaccines cause pressure selection on virus resulting in variants AND an increase in cases per million people.

21. As of 8 March 2023 more than 1.5 Million reported adverse events reported to the Vaccine Adverse Events Reporting System (VAERS). Almost 100,000 more injuries than the US Military has sustained since 1776.
22. As of 24 February 2023 there have been 34,576 COVID genetic vaccine deaths. More deaths than US Military has sustained in every war except our five bloodiest. Deaths happen within weeks to months.
23. Comparison of drugs FDA has been pressured to remove from the market due to deaths. The closest vaccine was the Swine Flu vaccine that caused a total of 53-deaths; compared with 34,576 COVID genetic vaccine deaths as of 24 February 2023.
24. Research conducted from September – November of 2021. Finally published after resistance due to potential concerns over the COVID genetic vaccines. The results show in every subject the inability of the blood to carry oxygen within 15-30 seconds. InflammoThrombotic clotting of blood within 20-30 seconds. The results were permanent.
